- CONCLUSION

Pistachio nuts

Phenolic compounds

Effects of phenolic compounds on human

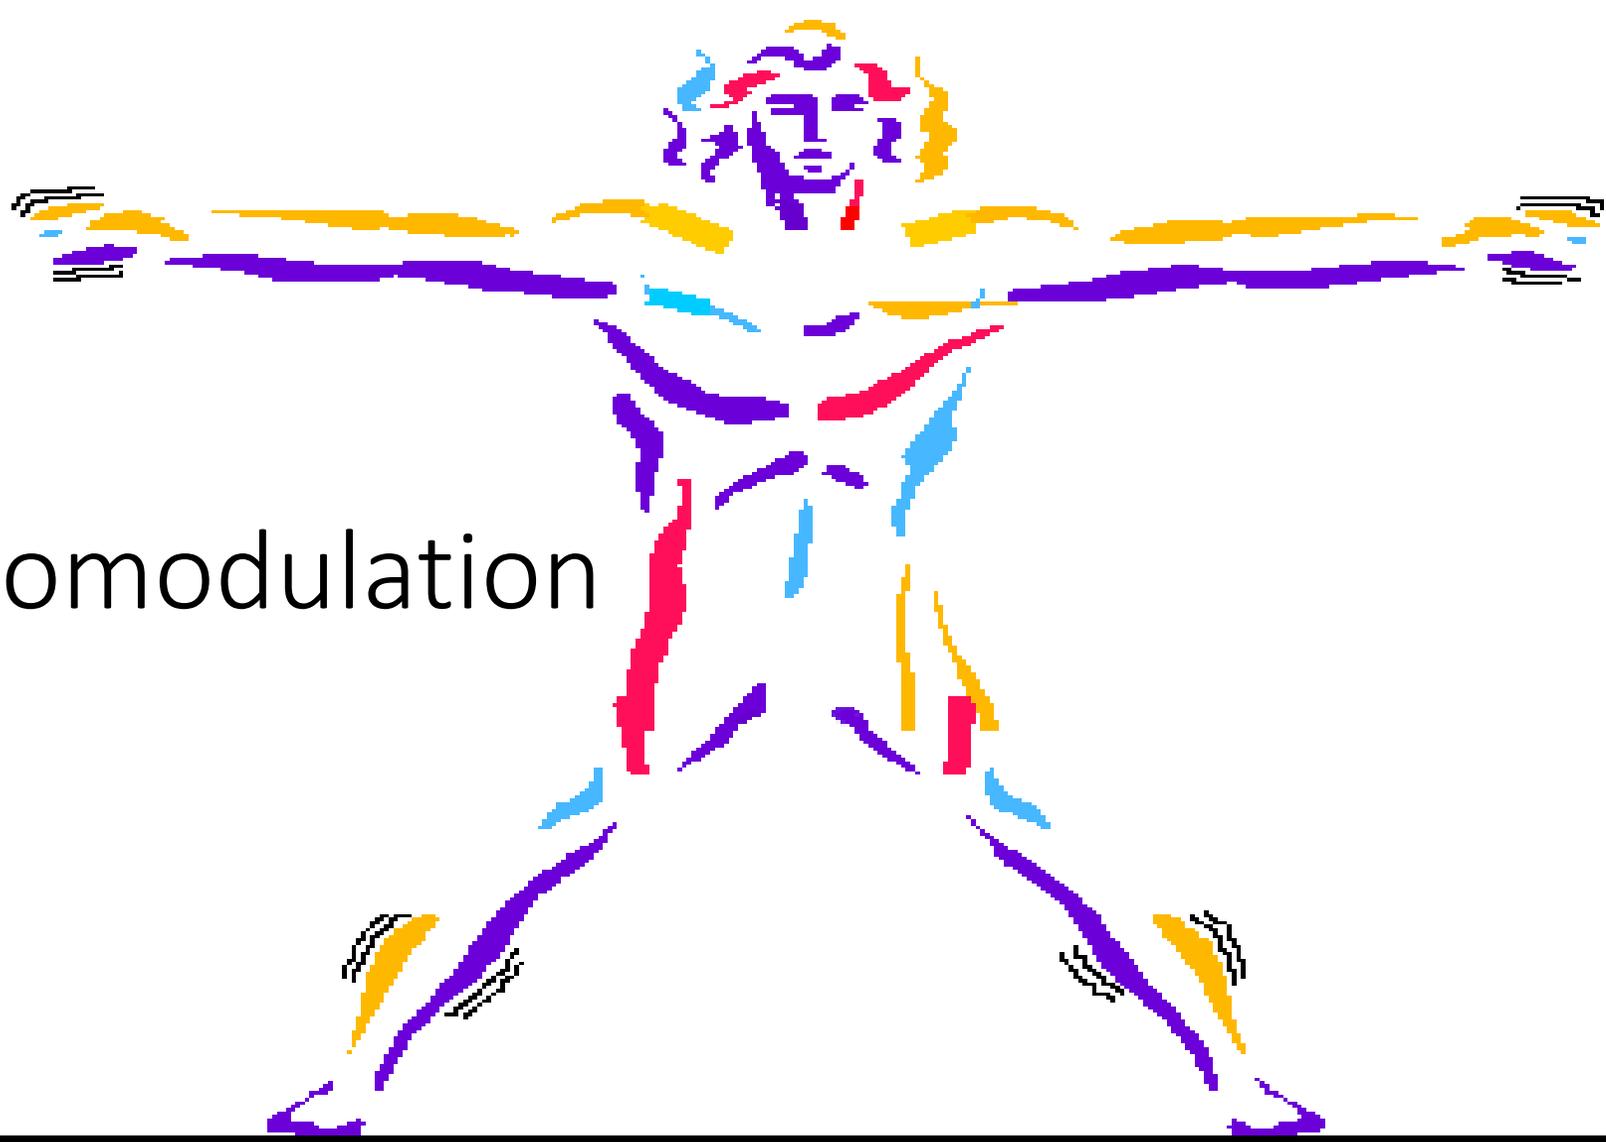

- Anticarcinogenic
- Anti-inflammatory
- Antioxidant
- Antidiabetic
- Antimicrobial
- Antiviral
- Antiallergic
- Antithrombotic
- Antipathogenic

Immunomodulation

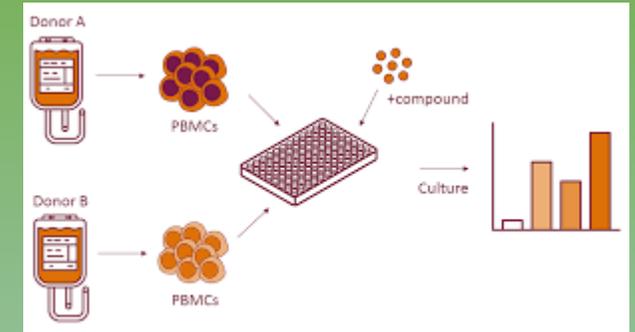

Purpose of Our Study

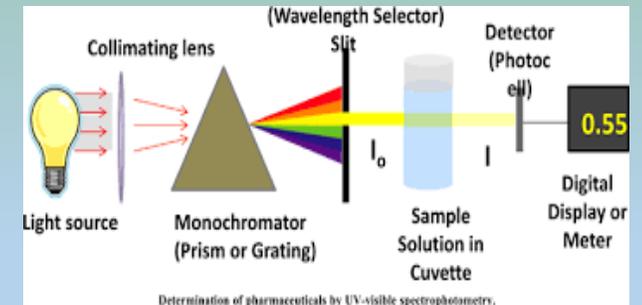

MATERIAL AND METHOD

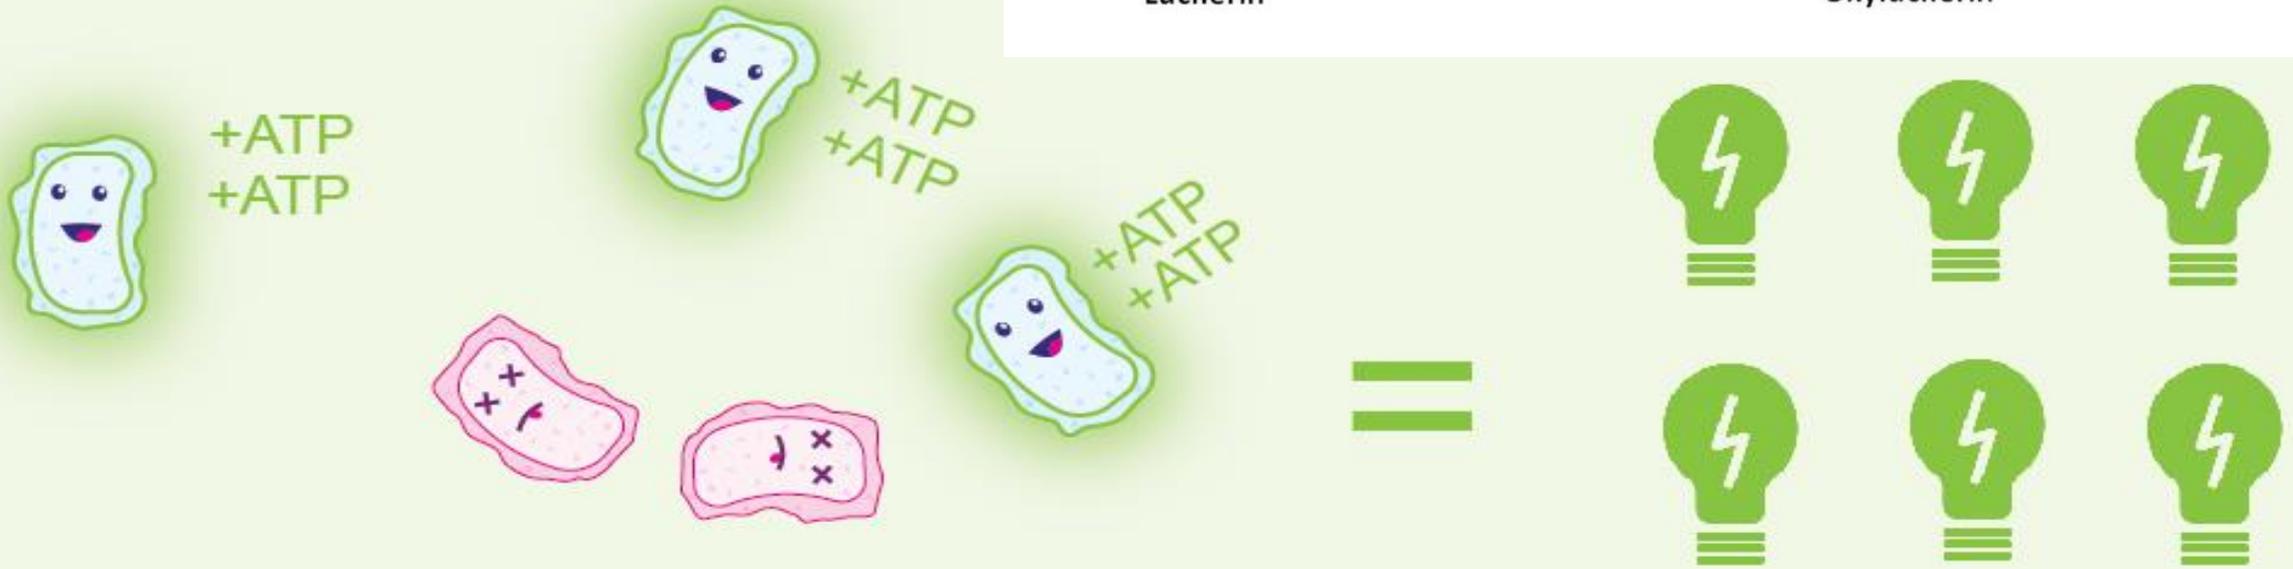

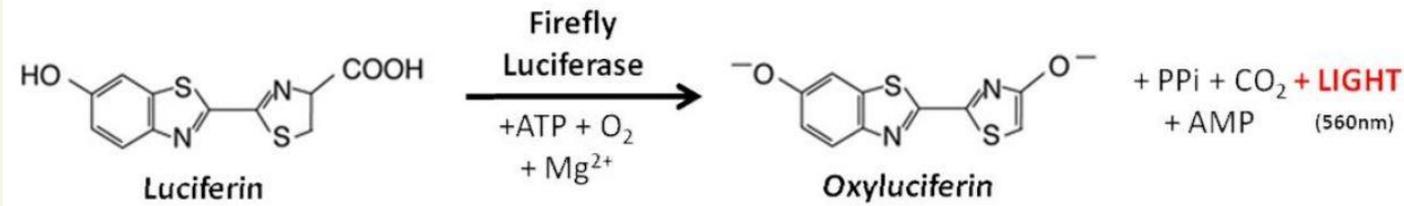

- A lymphocyte pool were created from waste whole blood of healthy individuals.

- Total phenolic content of pistachio extract obtained by appropriate methods were determined spectrophotometrically using Folin-Ciocalteu reagent.

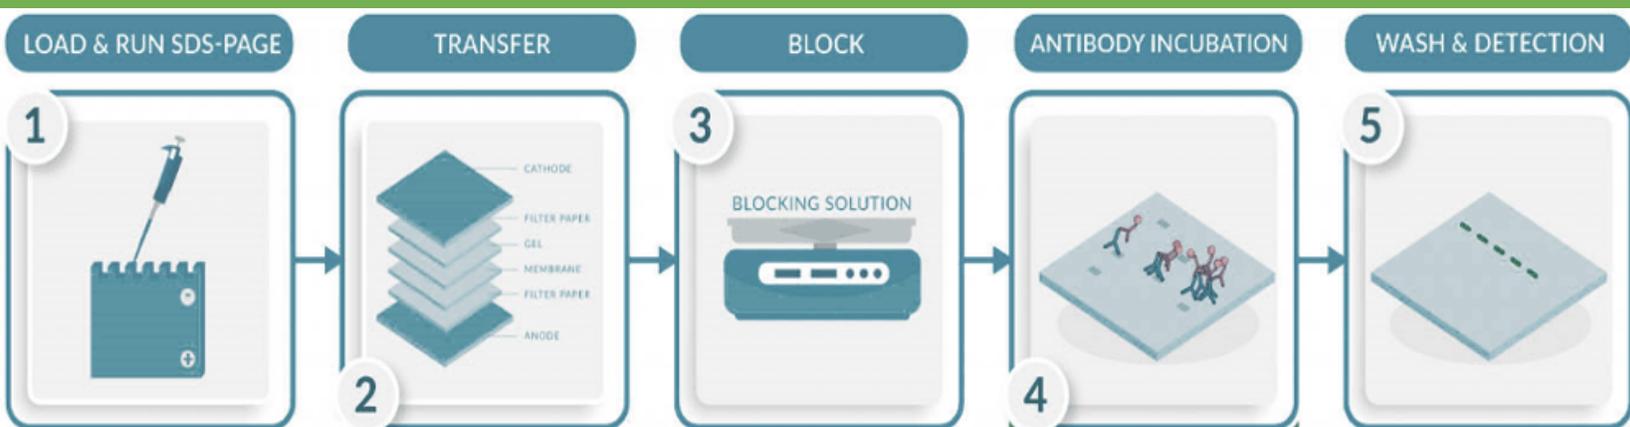

CONCEPT BEHIND THE ATP BIOLUMINESCENCE ASSAY

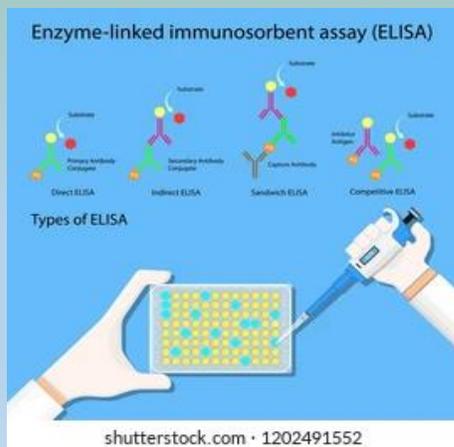

Under stable conditions, it is assumed that the amount of ATP in each live cell will be constant. In this example, each live cell has the same amount of ATP.

The bioluminescence signal produced will be directly related to the amount of ATP.

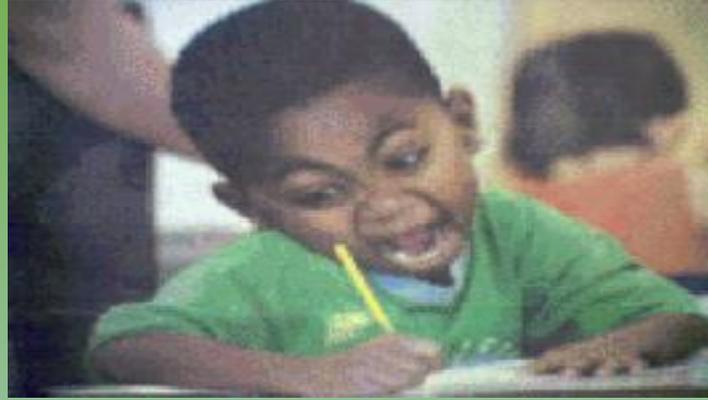

Katharine Martin

- **Western Blot** :Protein expressions of each group were determined with the help of western blot with NFkB primary antibody. And, house-keeping gene antibody beta-actin was used as control. Three groups(control were run in three times, with control, 20 $\mu\text{g/ml}$ and 50 $\mu\text{g/ml}$).

- **Elisa**: Elisa method was used for the measurement of IL values.

RESULT

Flavonoids

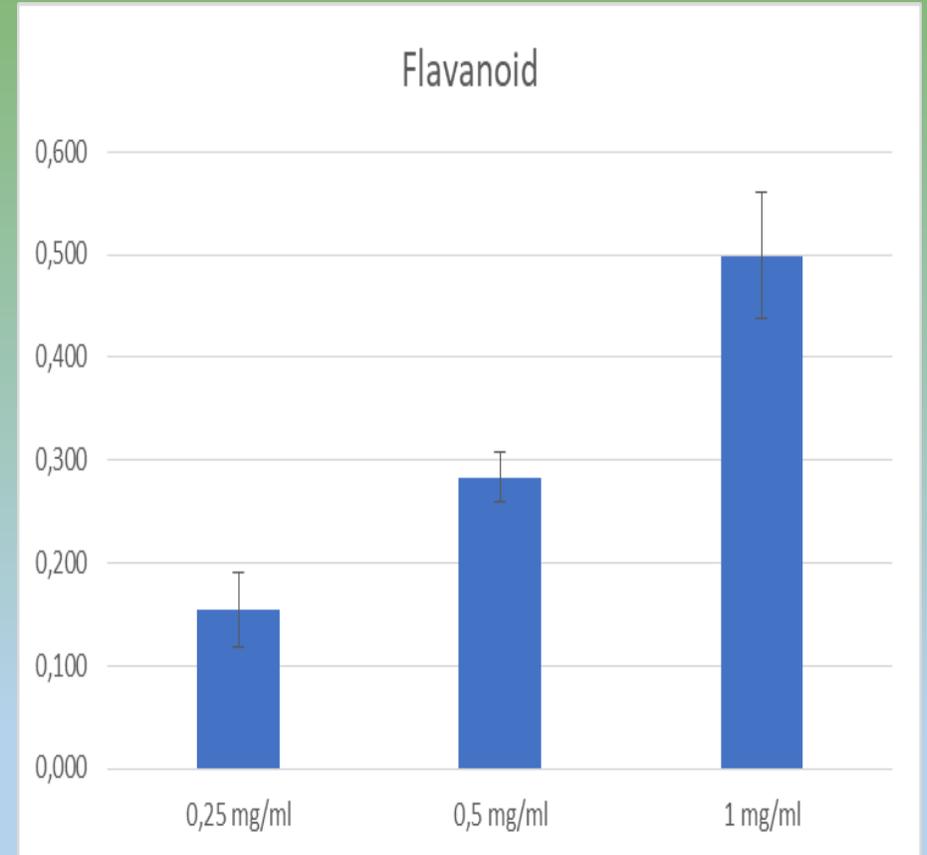

0,25 mg/ml → 0,154 mg que Eq/ml

0,5 mg/ml → 0,284 mg que Eq/ml

1 mg/ml → 0,499 mg que Eq/ml

Phenol

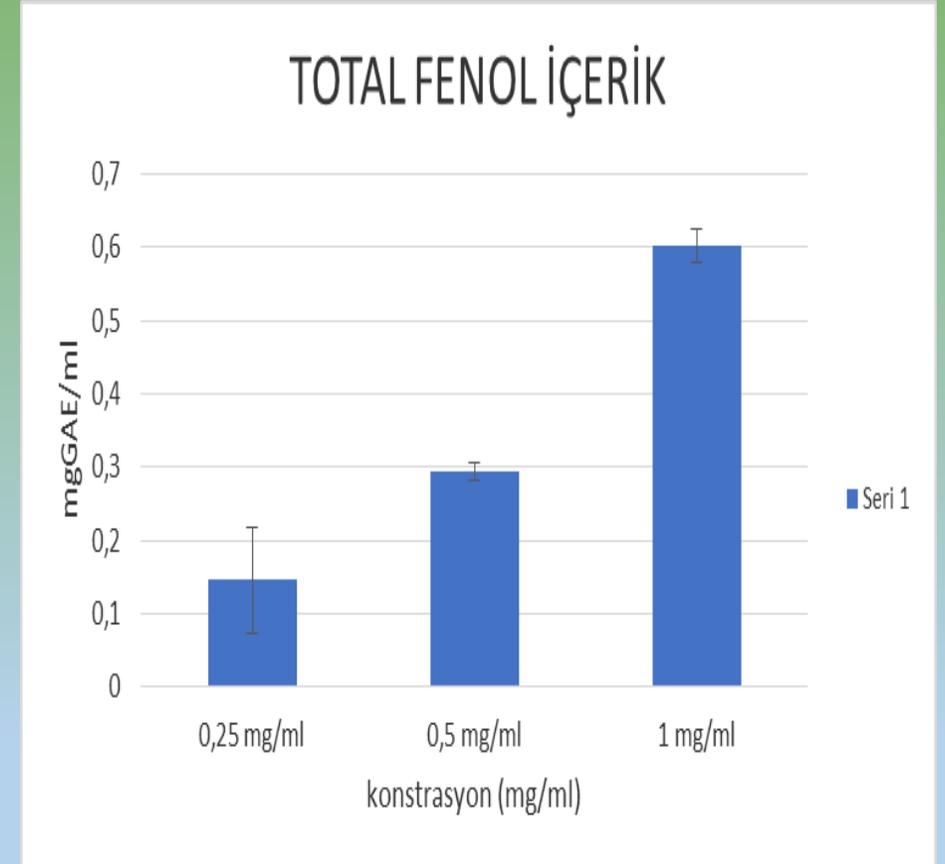

0,25 mg/ml → 0,145 mg GAE/mL

0,5 mg/ml → 0,294 mg GAE/mL

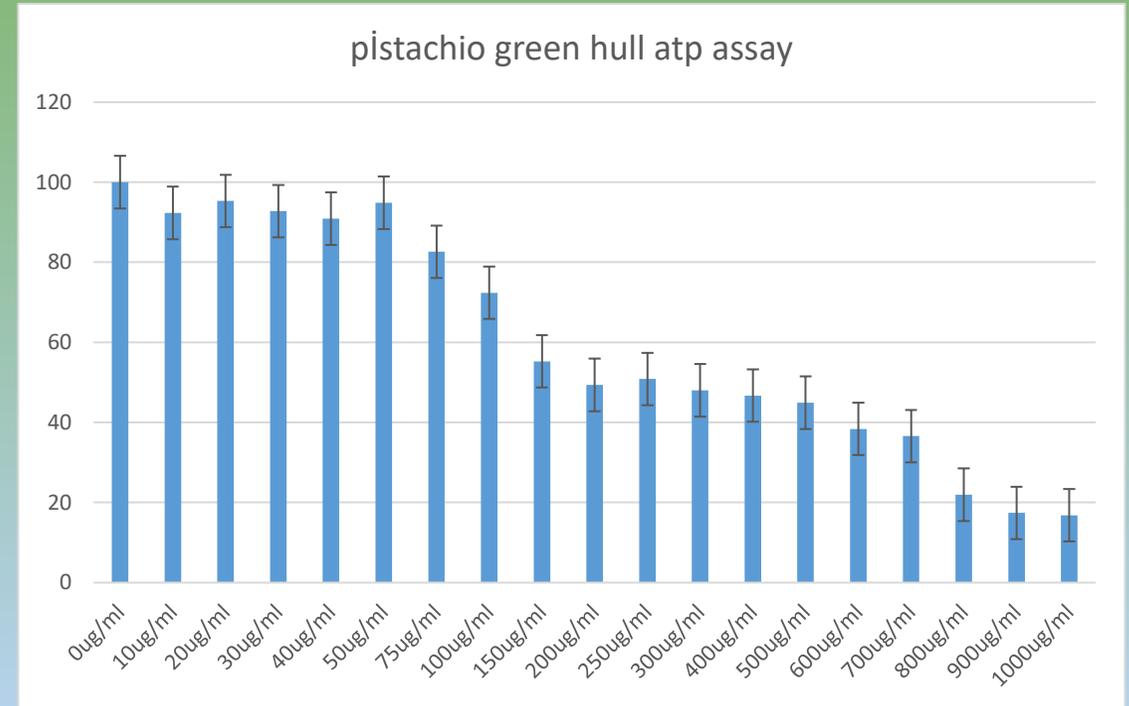

1 mg/ml → 0,602 mg GAE/mL
